Your Invitation

5th International Conference on Timber Bridges

Nau Mai, Haere Mai – Welcome!

We are thrilled to be hosting the 5th International Conference on Timber Bridges (5ICTB) in the stunning city of Rotorua, known for its volcanic and thermal activities that create a relaxing and therapeutic atmosphere. As the first time hosting this conference in the southern hemisphere, we are excited to welcome professionals from around the world to discuss the efficient and reliable use of timber bridges in transportation infrastructure.

Our focus on timber bridges aligns with the current need for resilient infrastructure to support thriving communities, and we believe that by bringing together leading professionals from various fields, we can collectively improve design, productivity, manufacture, supply, and maintenance of timber bridges for the next five decades and beyond.

With a strong panel of local and international speakers expected, we are confident that this conference will provide invaluable insights and knowledge exchange to drive improvements in timber bridge construction worldwide. In addition to the core conference program, we are offering visits to research facilities, manufacturing plants, and other educational expeditions, subject to delegate interest.

While attending the conference, we encourage you to explore the wonders of Rotorua, from its world-famous thermal areas and geysers to the Redwoods Whakarewarewa Forest with its exhilarating mountain bike trails and relaxing geothermal baths. Rotorua truly has something for everyone, whether you're seeking adventure or relaxation.

We extend a warm invitation to all delegates to join us in Rotorua, where Māori culture and the beauty of timber bridges will be showcased in unforgettable ways.

Nau mai, haere mai ki Rotorua! Welcome to Rotorua!

Conference Themes:

- Structural design of timber bridges
- Sustainability & environmental impact
- On-site construction of timber bridges
- Maintenance, assessment and monitoring of existing or historical bridges
- Railway bridges, or slow traffic timber bridges
- Shared user timber bridges for pedestrian and/or cyclists
- Materials, surfaces and durability
- Architecture and aesthetics of timber bridges
